

SPOTLIGHT

BEST BAR NONE

Light Bureau designed the lighting scheme for the inaugural Restaurant & Bar Design Awards (left) held at Village Underground, London in April. The concept was to highlight the key aspects of the architectural space and immerse the space and guests in a slow, ever changing environment. This was linked to all aspects of the awards ceremony's fluid format to create an ever changing lighting scheme, which was produced by Halo, throughout the night.

The award for best lighting scheme went to Isometrix Lighting + Design for its work on Sake No Hana (below) in London.
